
REFORM IN THE FIELD OF ART AND CULTURE IN RENEWING UZBEKISTAN

Abdullayev Khusan

Uzbekistan State Institute of Arts and Culture 1st-year master's degree in cultural studies

ANNOTATION

This article discusses measures and reforms aimed at developing the arts and culture in our country.

Keywords: *Reform, law, youth, culture, art, education, motivation, intellectual, renaissance.*

No matter what reforms we undertake in our country, we rely on young people like you, for your efforts. As you all know, today we have set great goals. We have begun to lay the foundations of the third renaissance in our Motherland.

President of the Republic of Uzbekistan Shavkat Mirziyoyev

Systematic organization of spiritual and educational work in our country, increasing the effectiveness of measures taken in this direction, raising the intellectual potential, consciousness and worldview of the population, especially youth, strengthening ideological immunity, patriotism, love and devotion to the people special attention is paid to the upbringing of a harmoniously developed generation. After all, young people are a solid foundation for the bright future of our country.

Raising the cultural level of our people, in particular, the youth, providing them with the best examples of national and universal culture, on this basis, educating spiritually mature, harmoniously developed individuals, building modern cultural and art institutions, strengthening their material and technical base, theatre, the development of music, fine arts, comprehensive support for creative communities, the realization of the potential and potential of young talents are among the priorities of our state. In today's world, where various conflicts are escalating, the time has shown that it is more important than ever to strengthen the spiritual immunity of our youth and to spend their free time meaningfully. That is why the 5 important initiatives put forward by the President are important.

It is known that the head of state put forward 5 important initiatives to organize the work in the social, spiritual and educational spheres on the basis of the new system. Focusing on the first initiative, it identified important issues such as increasing the interest of young people in music, painting, literature, theatre and other arts and helping them realize their talents. I think it is very important that today's young people grow up to be mature, intelligent, modern and creative, spiritually mature. I think that a person should have a high level of education and ideological immunity.

Then he will be able to resist any vices such as destructiveness, bigotry, terrorism and religious extremism. He can tell right from wrong, and most importantly, he can do good. I believe that the role of pop art in achieving such results and creating an effective system is great. Today, the head of our state pays great attention to culture and art, among other areas.

In particular, on January 20, 2021, the Law of the Republic of Uzbekistan "On cultural activities and cultural organizations" was promulgated. Article 8 of the law defines the powers of the Ministry of Culture of the Republic of Uzbekistan in the field of cultural activities:

-  implements the state policy in the field of cultural activities;
-  Ensures the development of theatre, music, choreography, variety, circus and folk arts;
-  Organizes festivals, competitions and exhibitions of professional and amateur artists in the

Republic of Uzbekistan and abroad; [1]

It is the duty of each of us to have a great history of our independent country, to have a generation of great scholars, to contribute to the development of a renewed Uzbekistan.

In this regard, it is necessary to deepen the values and traditions of society, in particular, to raise the spiritual and intellectual potential, consciousness and worldview of our people, especially the younger generation, to cultivate a harmoniously developed person who lives with love and devotion to the motherland and people. theatrical art and pop art are of great importance. Our country pays special attention to the development of these areas.

One of the most important tasks today is to take measures to strengthen the love of the Fatherland, involvement in its destiny, devotion to the profession, increase the effectiveness of educational processes and spiritual and educational work among students and teachers.

At today's new stage of renewal and modernization of our country, increasing the role and importance of culture and art in our lives, educating our young generation in the spirit of national and universal values, love and devotion to the motherland are among the important issues.

In today's globalization process, computer technology is becoming an integral part of our lives, transversely. The role of parents in the family and theatre in society is invaluable in inculcating such concepts, values and human qualities in the hearts and minds of children.

On January 19, a video conference chaired by the President of the Republic of Uzbekistan Shavkat Mirziyoyev was held on the issues of radical improvement of the system of spiritual and educational work, strengthening cooperation between state and public organizations in this regard.

The ideology of the new Uzbekistan we are creating will be the idea of goodness, humanity and humanism. When we say ideology, we mean, first of all, the education of thought, the education of national and universal values. They are based on the thousands of years of life concepts and values of our people, - said the head of state [2].

I really think that educating young people will have a big impact on our future. It is safe to say that today's youth are indifferent, lazy and ignorant of the reforms that are taking place. Many reforms are being carried out by the head of our state to put an end to such cases, to create opportunities for young people, to involve them in science, and to acquaint them with culture and art.

Bringing up our young people as people of high spirituality, deep thinking and independent thinking will serve as a great foundation for the implementation of the 3rd Renaissance in our country.
