

YOUNG PEOPLE WITH UNLIMITED OPPORTUNITIES**Ahmedova Nilufar Ma`murjonovna**

Author of the project "You are always in focus" in Namangan region

ANNOTATION

At present, at the initiative of the President, systematic work is being carried out in our country to educate the younger generation, to encourage them to grow in all respects, physically healthy, intellectually gifted, spiritually harmonious, in accordance with their work and achievements. At the same time, it is no exaggeration to say that a wide range of opportunities is being created for young people with disabilities in all areas. In this article we will talk about the wide range of conditions created for our young people with disabilities today.

Keywords: *young generation, harmonious development, physically healthy, initiatives, mature generation, incentives, disabilities, conditions.*

Every year on December 3 - International Day of Persons with Disabilities is widely celebrated around the world. On this day, children and young people with disabilities will be able to visit special schools, boarding schools, residential buildings, where they will be educated, and various holiday programs will be held. In our country, benefits are also introduced for children and youth with disabilities and their foster parents.

Happily, in our country, care is taken of families with children with disabilities, and special attention is paid to the education of these children in higher education on the basis of state grant quotas. The following decrees of the President are of paramount importance, including the decision of PF-52-70 of December 1, 2017, No. 393 of June 20, 2017 and No. 417 of June 2, 2018. There are a lot of young people who have died, and it will undoubtedly increase their self-confidence.

The decrees on measures to radically improve the system of state support for people with disabilities serve as a basis for radical changes in the lives of these young people.

People with disabilities have always been an integral part of our society. In particular, in recent years, the country has done a lot to support the population in need of social protection, including assistance in entrepreneurship. All of this is an encouragement to parents of children with disabilities and builds their children's confidence that they will find their place in the future.

The Department of Inclusive and Special Education of the Republican Center for Education aims to improve the quality and effectiveness of education in specialized educational institutions for children with disabilities, to achieve rehabilitation through the correction of deficiencies in the learning of students. Special correction programs have been developed to prepare for the study. Based on these programs, the existing textbooks have been adapted to modern technologies, methodological manuals and recommendations for teachers and parents have been prepared.

In this regard, on November 25, 2017 in Namangan region, women with disabilities, girls from families who have lost their breadwinners in need of social protection will be able to receive free vocational training, increase their desire to live, become professionals. In order to help them to realize their talents, to ensure their participation in the exhibition events in our country and to organize their leisure time in a meaningful way, I

organized a project "You are always in the spotlight" in our region. I have been training more than 100 women living in cities and districts in 8 specialties for free with my volunteer team.

As part of a special project, girls living in the districts and cities of the region go to their homes or special schools, where they are given the opportunity to learn a trade. This project is 4 years old, and this year it was recognized by the Agency for Youth Affairs of Uzbekistan and won the nomination for the best project of the year at the II Republican Forum of Volunteers, which is a clear proof of the effectiveness of this project. It is no exaggeration. The fact that our state pays more and more attention to such projects and supports them will help us to develop young people into mature people who will contribute to the development of the country in the future.

A skilled person will not be humiliated

In cooperation with the Youth Agency of the Republic of Uzbekistan and the Educational Center "Najot" organized a project "Imkon" for young people interested in IT. This project is organized to support young people with disabilities between the ages of 15 and 30 who are interested in the field of IT, to guide them to the profession, to congratulate the successful young people who passed the selection and to contribute to the

development of our country. At the same time, the "Opportunity" direction was created for school leaders. It is no exaggeration to say that this is an example of the attention paid to children from families with disabilities and in need of social protection.

In the eyes of the Council of Leaders of the Republic of Uzbekistan, the addition of the "Opportunity" direction is one of the opportunities created for children with disabilities in schools, children from families in need of social protection. I believe that it is important for each of us to look at them with hope and help them as much as we can.

My dear compatriot, my peer, let's not be indifferent, let's unite on the path of goodness.
