## INNOVATIVE CONTENT AND METHODS OF EDUCATING YOUNG PEOPLE IN THE SPIRIT OF PATRIOTISM

Yakhshibaeva Damira Tolibqizi  
Navoi State Pedagogical Institute, Uzbekistan

### Annotation

Summarizes the innovative content, essence and methods of educating young people in the spirit of patriotism. based on experience, the directions of forming students ' sense of duty, educational and educational qualities are highlighted.

*key word: homeland, patriotism, activism, devotion, involvement, duty, loyalty, initiative, honesty, truthfulness, generosity, humanity, justice, globalization.*

The formation of patriotism sense among young people has determined their upbringing direction in patriotism spirit today. Loving the motherland, valuing it as a place of worship, preserving it as the apple of our eye should become the creed of every young soul, as well as a civic duty. However, in today's globalization, the rapid changes in the market economy require the formation of a participatory quality in youth of our country.

In his address to OliyMajlis, President of Uzbekistan ShavkatMirziyoyev outlined the content and essence of patriotic education at present stage. In other words, the call "From the national revival is to bring up young people in the spirit of devotion to the motherland, the formation of initiative, dedication and moral qualities - on the basis of national uplift idea" - reflects the modern philosophy of "Human factor is spiritual power."

The example of the head of our state in supporting the nation: care for every citizen, every citizen's initiative to "have a homeland within the motherland", the initiative to end poverty; the passion of the young generation, which is the future of the country, to be no less than the world's youth in intellectual and scientific potential; to be in the trail of our ancestry in world of science (present Khorezmis, Berunis, IbnSinus, Navois) became an example of selflessness, patriotism and nationalism for all.

The deeper the understanding of the interests, dignity, destiny, prospects and love to motherland, the higher the sense of patriotism. At different stages are emerging historical, socio-political, spiritual culture and new aspects of patriotism. True patriotism means living with love for the Motherland, people, working tirelessly for the sake of its future and interests, and sacrificing our lives when the need arises.

The patriotism is to rejoice in the achievements of our Motherland in all spheres, to take care of our soil, every brick and plant, ancient and modern monuments, achievements in science and art, material and spiritual riches. This, in turn, further increases teachers responsibility. The essence of pedagogical patriotism is highlighted in the President's congratulatory message to teachers and coaches in 2019: "However, training

teachers and educators who teach our children on the basis of high standards and innovative thinking is the most difficult task and requires a lot of responsibility, as well as working for a very low salary."

In this sense, present teacher must be a flexible specialist, both in teaching and learning, that is, to work tirelessly on himself, to live in constant search.

Most importantly, the teacher must be a true patriot. However, only a teacher who has a strong love and devotion to his profession and the Motherland can bring up a true patriot.

It is important to develop patriotism sense in students, to educate them in the spirit of love and devotion to the Motherland. So, in pedagogical activity, first of all, patriotism is a deep sense of reform in our country, activism, initiative, being an example to young people, and the purpose of the reforms is to promote the essence of the public, including:

- Educate young generation, who are the future of the country, on the basis of high standards;
- Having high qualifications in their profession, study of best practices in the world and in our country,  innovative thinking and activity;
- Creativity, creativethinking, initiative;
- Dedication to make every pupil (child) happy, knowledgeable and polite;
- Education in every family is to work consistently on the basis of pedagogical laws and regulations and not wasting time;
- Qualities such as diligence play an important role in the pedagogy of society.

The educator should organize his activity on the basis of the following criteria, which form the patriotic spirit in the youth:

- Loyalty to the motherland, pride in the powerful roots of their nation;
- Getting acquainted with the example of high spiritual culture;
- Honor of ancestors - deep respect for the person, loyalty to one's personal conscience, duty and one's word;
- Dedication, interethnic harmony, religious tolerance;
- Transportation and reverence for spirituality, enlightenment, culture, morality, Uzbek and world culture, art and folk monuments;
- Internationalism is deeply study the history, customs and traditions of their own and other nations and peoples, to show them goodwill;
- Ideological immunity, national pride, self-awareness;
- Physical and spiritual perfection;
- Justice, humanity, involvement in the fate of the country;
- Integrity, honesty, generosity, modesty, courtesy;
- Entrepreneurship, socio-economic outlook, political citizenship, activism and initiative;
- To be able to protect oneself and others from the influence of religious-extremist ideas, various information attacks;

- □ Purposefulness, a sense of duty and responsibility to the motherland, the state, society, family, neighborhood - friends;
- □ Also, methodical training of future specialists in the implementation of patriotic education in the process of social practice.

Educating students in the spirit of patriotism is organized in various forms, including scientific-practical conferences, reading and other forms. They ensure the diversity of spiritual and educational work, and ultimately serve to create a healthy socio-spiritual environment in society.

Today, the following events can be organized as innovative forms of educating young people in the spirit of patriotism:

In the process of teaching general subjects - lectures, practical work, organization of question-answer parties;

- -Organization of individual and group conversations, meetings with veterans, scientists with rich life experience;
- -Scientific-theoretical and practical conferences, seminars-trainings, evenings on specific topics, discussions, quizzes, roundtables;
- -Study and dissemination of accumulated best practices, study of public opinion and public spiritual environment;
- -Television and radio broadcasts, films, works of art and music, speeches in the media;
- -Use of websites, electronic games and other technical means;
- -Organization of meetings with labor veterans, representatives of governmental and non-governmental non-profit organizations;

So, love for the Motherland, a sense of respect for it must be instilled in the hearts and minds of every citizen living on this land, including our students. First of all patriotic upbringing is the memory of ancestors, the memory and appreciation of their memory, the sensitive observation of what is happening in the distant and near surroundings.
